HEALTH FIELDS; PHYSICAL EDUCATION, OPTOMETRY

Deadline Date – February 16, 2010

Grant Resource – US Department of Health and Human Services

Category – Proteomics in Auditory Developmental and Disease Processes (R21)

Description – The molecular exploration of hearing has identified an impressive array of developing sensory organs and tissues. The identification of genes and the regulation of their corresponding proteins are important to normal and abnormal development, genetic disorders and environmental noise trauma. Numerous cell types, and their substructures, unique to the inner ear auditory pathway, such as hair cells, Deiters, Hensen, Claudius', interdental, and marginal/dark cells, and cells of the superior olivary complex have been virtually unexplored from a proteomic perspective. Additionally, middle ear infections (otitis media) and other diseases/disorders of the auditory system such as presbycusis, otosclerosis and cholesteatoma, pose important clinical challenges involving the identification of causative extrinsic factors, infectious organisms and the complexity of host response. Microarrays and other transcript troling technologies have been used successfully to increase the number of candidate genes, but clearly there remain interpretive limitations to the correlative protein function. Proteomic approaches have become increasingly successful and are gaining utility for studying complex biological problems relevant to the auditory system. Technologies using tandemly coupled two-dimensional (2-DE) gel electrophoresis and mass spectrometry (MS) for protein peptide identification (PMF-peptide mass fingerprinting) combined with the differentially isotopic labeling of protein allows profile comparisons between two different cellular states (e.g. disease versus non-disease).

Size of Grant - \$275,000 for 2 year project

Grant Resource –US Department of Health and Human Services ARRA

Category – ARRA: Accelerating Adoption of Comparative Effectiveness Research Results by Providers and Patients (R18)

Description – This FOA invites grant applications from organizations that propose to develop and test interventions to improve the translation and adoption of existing comparative effectiveness research (CER) information and incorporate these findings into practice in both the public and private sectors. Doing so effectively would demonstrate a return on the CER investment, and, more importantly, improve the health of patients. Funds will be used to support organizations that 1) develop and implement evidence-informed and innovative CER-based adoption interventions targeting patients and/or providers; 2) develop proposals that test the implementation of CER-based adoption strategies within and across organizations and delivery systems and analyze any behavior change (in patients and/or providers) associated with the intervention. CER-based entails the applicant describing and justifying the existing comparative evidence that is the focus of the adoption intervention.

SAFETY

Deadline Date – February 26, 2010

Grant Resource – US Department of Education

Category – Natural Disaster Planning

Description – Past emergencies, such as the events of September 11, 2001, Hurricanes Katrina and Rita, and emergencies related to other natural and man-made hazards, reinforce the need for schools and communities to plan for traditional crises and emergencies, as well as other catastrophic events. The Readiness and Emergency Management for Schools (REMS) grant program provides funds to local educational agencies to establish an emergency management process that focuses on reviewing and strengthening emergency management plans, within the framework of the four phases of emergency management (Prevention-Mitigation, Preparedness, Response, and Recovery). The program also provides resources to LEAs to provide training for staff on emergency management procedures and requires that LEAs develop comprehensive all-hazards emergency management plans in collaboration with community partners including local law enforcement; public safety, public health, and mental health agencies; and local government.

SCIENCE; ENVIRONMENTAL SCIENCE; BIOLOGY; CHEMISTRY

Deadline Date – February 1, 2010

Grant Resource – US Department of Fish and Wildlife

Category – Migratory Birds

Description – This is a request for proposals for our SJV Awards Program. The objective of the SJV Awards Program is to support the investigation and conservation of birds and their habitats within SJV boundaries by providing funds through a competitive program. Proposals for projects that support the SJV mission and objectives are eligible for funding. This includes: habitat management, research, monitoring, education, community involvement, outreach, planning, ecotourism, and professional training. Proposals must address the objectives and recommendations of the SJV Bird Conservation Plan or Waterfowl Management Supplement. In addition, the SJV encourages the following: projects that are habitat oriented; projects that have funds leveraged and/or in-kind contributions; projects that have partnerships, especially new or non-traditional partnerships; projects that address threats that affect distribution and abundance of priority species and habitats; projects that address multiple species (however, we do encourage single species projects that address a specific SJV objective); projects that include multiple benefits especially in the areas of habitat, monitoring, research, outreach, planning, education,

involvement of indigenous or local communities, and/or professional training; projects focusing on monitoring work that is part of a long-term project or is part of a Coordinated Bird Monitoring project; and projects that are a segment of consensus-built larger project.
