AGRICULTURE

Deadline Date – January 10, 2010

Grant Resource – Environmental Protection Association

Category – Pesticide Food Allergies

Description – This grant is for applied research on innovative or improved methods to predict whether or not a pesticide protein is a food allergen. Research to characterize the key factors that influence human immune responses to dietary proteins is needed in order to better assess potential food allergy from genetically engineered plants. Proposals are requested on the role of dose, route of sensitization, and/or the physicochemical properties of ingested proteins and their influence on the development of immune sensitization, oral tolerance, or the elicitation of allergic symptoms. Also of interest is how the food matrix and gastrointestinal environment in which proteins are ingested may affect these immune responses.

ARTS AND CULTURE

Deadline Date – October 19, 2009 Letter of Intent

Grant Resource – Rockefeller Foundation and Doris Duke Charitable Foundation

Category – Contemporary Arts Performance Projects

Description – The MAP Fund works to help build a risk-welcoming contemporary performance field by providing project-specific funding to playwrights, choreographers, directors, composers, and performers experimenting in any performance tradition or discipline. MAP seeks especially to support work that brings insight to the issue of cultural difference or the concept of "other," be that in class, gender, generation, ethnicity, or formal consideration. Letters of inquiry and full applications must come from organizations based in the United States that have current nonprofit 501(c)(3) federal tax status. Unincorporated artists or ensembles may apply to MAP through an eligible fiscal sponsor. Organizations and artists must demonstrate at least two years' professional experience. MAP supports only projects that include a live performance.

Grant Resource – National Endowment for the Humanities

Category – America’s Historical and Cultural Organization Program Grants

Description – America’s Historical and Cultural Organizations grants support projects in the humanities that explore stories, ideas, and beliefs that deepen our understanding of our lives and our world. The Division of Public Programs supports the development of humanities content and interactivity that excite, inform, and stir thoughtful reflection upon culture, identity, and history in creative and new ways. Grants for America’s Historical and Cultural Organizations should encourage dialogue, discussion, and civic engagement, and they should foster learning among people of all ages. To that end, the Division of Public Programs urges applicants to consider more than one format for presenting humanities ideas to the public. NEH offers two categories of grants for America’s Historical and Cultural Organizations: Planning and Implementation Grants.

Deadline Date – January 5, 2010

Grant Resource – US Department of Health and Human Services NIH

Category – Pain Research

Description – The purpose of this Funding Opportunity Announcement, “Mechanisms, Models, Measurement, & Management in Pain Research” is to inform the scientific community of the pain research interests of the various Institutes and Centers at the National Institutes of Health and to stimulate and foster a wide range of basic, clinical, and translational studies on pain as they relate to the missions of these ICs. New advances are needed in every area of pain research, from the micro perspective of molecular sciences to the macro perspective of behavioral and social sciences. Although great strides have been made in some areas, such as the identification of neural pathways of pain, the experience of pain and the challenge of treatment have remained uniquely individual and unsolved. Furthermore, our understanding of how and why individuals transition to a chronic pain state after an acute insult is limited. Research to address these issues conducted by interdisciplinary and multidisciplinary research teams is strongly encouraged, as is research from underrepresented, minority, disabled, or women investigators.

Category – Cancer Nanotechnology Training Centers

Description – This Funding Opportunity Announcement (FOA) solicits applications for the development of: Cancer Nanotechnology Training Centers (CNTCs) as a component of the NCI Alliance for Nanotechnology in Cancer (The Alliance) (<http://nano.cancer.gov>). In addition to the CNTCs, the Alliance will consist of the Centers for Cancer Nanotechnology Excellence (CCNEs, as the core of the program infrastructure), platform projects (CNPPs), and a K99/00 career transition program. The CNTCs are

designed to establish innovative research education programs supporting the development of a multi-disciplinary nanotechnology workforce capable of pursuing cancer research. The proposed CNTCs should target graduate student and post-doctoral researchers of broad background (in medicine, biology, and other health sciences as well as in the physical sciences, chemistry, and engineering). The program of multi-disciplinary research education in cancer nanotechnology should be primarily focused on mentored laboratory-based training through participation in dedicated training research projects. In addition to funds for the training projects, CNTC awards may be used to support participants salaries for up to two years. Courses, seminars, and other forms of research education may also be included in the CNTC program.

Deadline Date – September 30, 2019

Grant Resource – Air Force Academy

Category – Cadet Research

Description – The Air Force Academy invests in an active research program for three main reasons. First and foremost, research significantly enhances the cadet learning experience. Our research is done by, for and with cadets who work alongside fellow cadets and faculty mentors. Research provides cadets with rich independent learning opportunities as they tackle ill-defined problems and are challenged to apply their knowledge and abilities. Secondly, our research program provides opportunities for essential faculty

development. Research broadens and deepens the experience base of the faculty. This infuses current, relevant, state-of-the-art and cutting-edge applications and examples into the curriculum.

Size of Grant - \$1 million to \$50 million

Cost Sharing or Match – No
