Grant Resource – National Endowment for the Humanities

Category – America's Historical and Cultural Organizations – Planning Grant

Description – America's Historical and Cultural Organizations grants support projects in the humanities that explore stories, ideas, and beliefs that deepen our understanding of our lives and our world. The Division of Public Programs supports the development of humanities content and interactivity that excite, inform, and stir thoughtful reflection upon culture, identity, and history in creative and new ways. Grants for America's Historical and Cultural Organizations should encourage dialogue, discussion, and civic engagement, and they should foster learning among people of all ages. To that end, the Division of Public Programs urges applicants to consider more than one format for presenting humanities ideas to the public. Planning grants are available for projects that may need further development before applying for implementation. This planning can include the identification and refinement of the project's main humanities ideas and questions, consultation with scholars in order to strengthen the humanities content, preliminary audience evaluation, preliminary design of the proposed interpretive formats, beta testing of digital formats, development of complementary programming, research at archives or sites whose resources might be used, or the drafting of interpretive materials.

Grant Resource – National Endowment for the Humanities

Category – America’s Historical and Cultural Organizations – Implementation Grant

Description – Grants for America’s Historical and Cultural Organizations should encourage dialogue, discussion, and civic engagement, and they should foster learning among people of all ages. To that end, the Division of Public Programs urges applicants to consider more than one format for presenting humanities ideas to the public. Implementation grants support the final preparation of a project for presentation to the public. Applicants must submit a full walkthrough for an exhibition, or a prototype or storyboard for a digital project that demonstrates a solid command of the humanities ideas and scholarship that relate to the subject. Applicants for implementation grants should have already done most of the planning for their projects, including the identification of the key humanities themes, relevant scholarship, and program formats. For exhibitions, implementation grants can support the final stages of design development, but these grants are primarily intended for installation. Applicants are not required to obtain a planning grant before applying for an implementation grant. America’s Historical and Cultural Organizations grants support projects that are presented in these formats: traveling exhibitions that are presented at multiple venues; long-term exhibitions at one institution; interpretive Web sites or other digital formats; interpretation of historic places or areas; reading and discussion programs; panel exhibitions that travel widely, reach a broad audience, and take advantage of complementary programming formats, to enhance the visitor experience; or other project formats that creatively engage audiences in humanities ideas. Applications that make innovative use of emerging technologies are encouraged. Projects must do more than simply provide a digital archive of material but should offer new ways of contextualizing and interpreting information that engages public audiences interactively in exploring humanities ideas and questions. Applications may include plans to create Web sites, PDA tours and resources, podcasts, virtual environments, wiki formats other formats that utilize user-generated content, virtual imaging, GIS mapping, online scholar-led discussions, video on demand, streaming video, games, or other digital formats.

Category – NEA American Masterpieces: Chamber

Description – The Arts Endowment’s support of a project may start on or after May 1, 2010. The performances and educational activities should take place by September 30, 2011. American Masterpieces: Three Centuries of Artistic Genius is a major initiative to acquaint Americans with the best of their cultural and artistic legacy. Through American Masterpieces, the National Endowment for the Arts will sponsor performances, exhibitions, tours, and educational programs across all art forms that will reach large and small communities in all 50 states. This component of American Masterpieces will celebrate the extraordinary and rich evolution of chamber music in the United States. Through performances and related educational activities, American chamber music of the highest quality will be experienced by Americans in communities across the nation. Grants are available for chamber music performances in conjunction with educational activities that will highlight specific repertoire by American composers, and enable ensembles to engage with communities in a variety of settings. The Arts

Endowment is particularly interested in projects that have at least one performance and two educational activities. The Arts Endowment plans to support a range of projects that reflect the breadth of chamber music. For the purposes of this initiative, chamber music generally is defined as one player to a part, performed without a conductor, with between two and ten players; duos must perform as an ensemble of equal partners. Chamber music encompasses music for traditional ensembles such as string quartets and trios, as well as compositions for mixed ensembles, traditional and indigenous instruments, and jazz.

Deadline Date – September 7, 2012

Grant Resource – National Institutes of Health

Category – Basic and Clinical Studies of Congenital Urinary Tract Obstruction

Description – This Program Announcement is sponsored by the NIDDK and the NICHD. Congenital obstructive uropathy is one of the major causes of chronic kidney disease and end stage renal disease (ESRD) in infants and children. The pathogenesis of this disorder, however, remains poorly understood. Many controversies and clinical uncertainties exist in the detection, prognosis, and effective treatment strategies for this condition. The impact of early fetal detection and neonatal intervention, the long-term effects of watchful waiting and the various surgical interventions have not been well studied and documented. There is also no consensus on the indications for, or ideal timing of surgical intervention.

The purpose of this funding opportunity is to address the numerous scientific and clinical uncertainties related to the development, treatment and prognosis of congenital obstructive uropathy, by encouraging and facilitating research in diverse areas. These areas include: the development of objective prognostic markers; the genetic determinants of this congenital disorder; the development of reliable animal models of the disorder; and, evaluation of the long-term effectiveness of various treatment strategies. Mechanism of Support. This FOA will utilize the NIH Research Project Grant (R01) grant. Funds Available and Anticipated Number of Awards. Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. The total amount awarded and the number of awards will depend upon the mechanism numbers, quality, duration, and costs of the applications received.

Grant Resource – National Institutes of Health

Category – Ruth L. Kirschstein National Research Service Award for Individual Predoctoral Fellows in Nursing Research

Description – Purpose. This FOA issued by the National Institute of Nursing Research (NINR/NIH), National Institutes of Health, encourages Individual Predoctoral Fellowship (F31) applications from institutions/organizations that propose to increase the number of nurses prepared with a doctoral degree in order to meet the demands for adequately trained behavioral, biological, and biobehavioral scientists. NINR is particularly interested in facilitating the progress of students who are in research training programs for recent nursing graduates and students in BSN to PhD programs. This fellowship program will provide predoctoral training support for doctoral students. The applicant must propose a research training program and dissertation research that is consistent with the scientific mission of the NINR. Research topics and skills that will serve as a foundation for an ongoing program of research are of particular interest. The research training experience must enhance the applicant's conceptualization of research problems and research skills, under the guidance and supervision of a committed mentor who is an active and established investigator in the area of the applicant's proposed research. The research training program should be carried out in a research environment that includes appropriate human and technical resources and is demonstrably committed to the research training of the applicant in the program he/she proposes in the application. Mechanism of Support. This FOA will utilize the F31 grant mechanism. Funds Available and Anticipated Number of Awards. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications.

Grant Resource – Avon Foundation

Category – Breast Cancer

Description – The mission of the AFBCF is to link medically underserved women to breast health education and screening services. Medically underserved women need targeted, customized approaches that enable them to obtain regular mammograms and clinical breast exams. Successful programs have:

- culturally-competent educational strategies;
- dedicated staff with specialized language and communications skills; and
- participation from members of the targeted community who can reach women where they live, work and worship. These individuals offer personalized assistance to women for whom it is often difficult to access health care. The Avon Foundation Breast Cancer Fund supports programs that: recruit women for both first time screening and annual screening; develop partnerships between community-based outreach providers and local medical providers; work with health care

providers to ensure proper clinical follow-up of abnormal screening results; and educate older women (> 65 years old) about Medicare coverage of annual screening mammograms and assist them in obtaining the service from providers who accept Medicare.

Grant Resource – Norcross Wildlife Foundation

Category – Environmental Preservation on Wild Lands

Description – The Norcross Wildlife Foundation provides support to local grassroots organizations throughout the United States that work to protect wild land. Priority is given to organizations that have difficulty raising the modest funds they need to do their critical work in the trenches of environmental conservation. Grants averaging \$5,000 are primarily provided for program-related office and field equipment, and public education and outreach materials. The Foundation also provides no-interest loans to local organizations to help them acquire land they have prioritized for conservation. Applications for both grants and loans may be submitted at any time.
