

2013 Research Experience for Undergraduates
George E. Brown Network for Earthquake Engineering Simulation (NEES)
Application deadline Thu Feb 28 2013 <http://nees.org/education/for-students/reu-program/>

DETAILS:

The George E. Brown Network for Earthquake Engineering Simulation (NEES) hosts a 10 week Research Experience for Undergraduates at 8 large scale seismic testing facilities around the U.S., for upper division undergraduate students interested in Civil, Electrical or Computer Engineering, and other fields related to seismic risk mitigation.

The NEES network includes state-of-the-art equipment to support physical simulations of earthquakes and tsunamis.

Each participant will be assigned to an individual project that contributes to the goals of an existing NEES research project or to development of cyberinfrastructure tools and/or educational modules.

For more information and the application, visit:

<http://nees.org/education/for-students/reu-program/>

The first deadline to apply is February 28.

While applications will continue to be accepted until all positions are filled, first priority will be given to those who apply before February 28.
